If this lab is an Individual assignment, you must do all coded programs on your own. You may ask others for help on the language syntax, but you must organize and present your own logical solution to the problem. No lab is complete until the student submits the signed pledge form associated with that lab. I realize that no coded programs will be graded until I turn in the sign & pledge form associated with that program; any late penalties will continue to compound until the pledge form is submitted.

If this lab is a team assignment, both team members may share logic as they program side by side on their own computers. Each person must type all of his/her own code as part of the learning process. Team assignments are never to be "You do this portion and I'll do that portion" or "You do this lab and I'll do the next lab".

Some of the lab assignments will have short answer questions. These short answer questions will be spot checked and graded for completion, but not checked for accuracy. Once these labs are graded and returned, I encourage you to compare answers with another class member who has also had the lab graded and returned.

We realize that the penalty for turning in work that is not my own, or assisting others in doing so, can range from an "F" in the class to dismissal from Trinity University. I realize that it is a violation of academic integrity to share any portion of this lab with any person (outside my 2320 team & professor)!

Print Name _________________________________________ Time Required = ______.____ Hrs.
Signature ___________________________________________________ (pledged)

OOP- 8 DA-BinTree-3
Delete & Delete Tree
Individual Assignment
45 Points

1) __________ {Initial/Pledge} ➞ I have kept track of the number of hours that I have spent on this lab; I have recorded it above.

2) __________ {Initial/Pledge} ➞ Make a copy of folder TomH-DA-BinTree-2 ➞ call it TomH-DA-BinTree-3 (Use your first name and last initial).

3) This application is the direct access file implementation of the Binary Tree.

4) __________ {Initial/Pledge} ➞ I have either removed, or commented out, my practice code from this project.

5) __________ {Initial/Pledge} I have uncommented all of the test code, in Diagnostic Levels 1-53, provided by Dr. Hicks. I have examined the output from all of the testing levels carefully; all of my test code works flawlessly! Please Initial each of the diagnostic testing levels if and only if you have examined the output carefully and feel that your functions are working perfectly.

_________ Diagnostic_Level 30 _________ Diagnostic_Level 31 _________ Diagnostic_Level 32
_________ Diagnostic_Level 33 _________ Diagnostic_Level 34 _________ Diagnostic_Level 35
_________ Diagnostic_Level 36 _________ Diagnostic_Level 37 _________ Diagnostic_Level 38
_________ Diagnostic_Level 39 _________ Diagnostic_Level 40 _________ Diagnostic_Level 41
_________ Diagnostic_Level 42 _________ Diagnostic_Level 43 _________ Diagnostic_Level 44
_________ Diagnostic_Level 45 _________ Diagnostic_Level 46 _________ Diagnostic_Level 47
_________ Diagnostic_Level 48 _________ Diagnostic_Level 50 _________ Diagnostic_Level 51
_________ Diagnostic_Level 52 _________ Diagnostic_Level 53

---
6] ________ {Initial/Pledge} ➔ I have updated all of the documentation. Each and every function, in which I have written/added code has me as the author and an appropriate date.

# define DA_BINTREE_DIAGNOSTIC_LEVEL 50

7] ________ {Initial/Pledge} ➔ I set the Diagnostic Level to 50 & recompiled the program before placing it in my To Be Graded Folder on Mars.

8] ________ {Initial/Pledge} ➔ I ran my Project.exe file (in the Debug Folder) on Mars ➔ to make sure that I have the correct files in my “To Be Graded Folder”. When I run the Executable, it begins with Diagnostic Level 24.

9] ________ {Initial/Pledge} ➔ I have placed folder TomH-DA-BinTree-3 in my “To Be Graded Folder” on Mars; there is also a TomH-DA-BinTree-1 folder there.

10] ________ Initial/Pledge ➔ I have placed TomH-DA-BinTree-3 on my personal computer.

11] ________ Initial/Pledge ➔ I have placed TomH-DA-BinTree-3 on my network drive or flash drive.

What To Turn In

- - - - - - - - - - - No Lab Is Complete Until Both Are Complete - - - - - - - - - - -

1] You sign & submit the Pledge form.
   a) Make sure that all program files have a header box with a purpose that clearly defines what you are accomplishing in this lab.
   b) Make sure that each and every program function has a well formed documentation box that clearly describes the purpose.
   c) Make sure that each and every program function header box has the appropriate Written By and Date.
   d) Review the Pledge statement
   e) Sign & Pledge
   f) Record the amount of time you think you spent on this lab
   g) Staple all pages of this lab. Fold in half length-wise (like a hot-dog). Put your name on the outside. Place it on the professor desk before the beginning of lecture on the day it is due. The penalty for late homework will not exceed 25% off per day.

2] Place all programming code associated with this program, if any, in the Professor’s Code Drop Box
   a) I do not accept programs by mail; do not submit labs via email!

- - - - - - - - - - - Comments - - - - - - - - - - -

A] Programs that do not compile are worth little, if anything.
B] If a print statement format is off, the penalties will often be less than the 25% per day late penalty; turn in the lab. You would not be happy if you went to Best Buy and purchased a large screen TV that did everything except show the picture; you would consider it pretty worthless. Most users consider software that does not work properly pretty useless as well. If the lab is not working correctly, credit will be small (if any); you might be better to accept a 25% (1 day) late penalty and turn in the lab working correctly!
C] Start all programs early so that you can get in contact with the professor if you have problems.
D] If you are turning in this lab late, you may
   ➢ hand it to me if I am in the office
   ➢ put it in the mail box outside my office door
   ➢ slide it under the outer door to our suite (if locked)
   ➢ slide it under my office door. The sooner I get late labs, the sooner the late penalty meter quits clicking.
E] Backup your programs in at least three places. Put a copy on your Y drive. Put a copy on your flash drive. Put a copy on your personal computer. Send yourself a copy in your e-mail.
